DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to photonic crystal structure classified in class 385, subclass 142.
- II. Claims 10-18 drawn to method of making a microcavity structure classified in class ⁴²³~~252~~, subclass ²⁶³~~301.4~~.

mpm

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, e.g., thermal neutron irradiation and/or pulse doping.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
